

TELOS APP FLOW

Pages:

Ownership

Before logging in, the user will have to register. The first stage of registration is the “Ownership” page. This page is here to record the number of owners to the flat/unit, which will determine how many proxy signatures and Hong Kong Identity Card (HKID) photos and numbers are required for each account. For example, if during the registration process, there are two owners that have been recorded, this account will then require two HKID photos and numbers, as well as two proxy signatures. The flow will make more sense as you go through the app.

ID verification (1/2)

Before going through the “Company Chop”, “Register” and “Personal Details” pages, the first owner will have to upload a photo of their Hong Kong Identity Card and enter their HKID number. The ‘拍 | Take’ button takes them to their camera app.

ID verification (2/2)

The second owner will need to do the same. For “Company Chop”, “Register” and “Personal Details” pages, only one set of information is required. This account information is shared between the two owners (or however many depending on the context).

Profile

When the user clicks on ‘password’, the “reset password” page will appear, which is just a modal popup asking the user to input new password information.

Noticeboard

The noticeboard page has a list of cards, where each card, when clicked, will open up a pdf file in-app.

Upcoming Meetings

The upcoming meetings page has a list of cards, where each card is linked to a specific upcoming meeting.

upcoming meeting 1 (view polls)

This page has a unique card called “View Polls”, which when clicked on, opens up a proxy agreement form. This card is only present when users have not agreed to the proxy agreement. The “company chop agreement (contingent)”, “upcoming meeting 1 - proxy signature”, and “upcoming meeting 1 - proxy done” pages are part of one proxy agreement process. Note that proxy signature pages are split into “1/2” and “2/2”, due to the fact that there may be more than one owner per unit, therefore requiring *that* many signatures. Each owner must sign on the same phone that is currently logged in.

Also, until this proxy confirmation process is complete by the user, the page will always have a “View Polls” card. Once the proxy forms are complete, the “upcoming meeting 1” page will show, revealing the different polls in different cards.

Upcoming Meeting 1

This page has a expandable bar saying Poll 1, which when clicked, expands information about the poll (see “upcoming Meeting 1 - Poll 1 Expanded”).

Upcoming Meeting 1 - Poll 1 Expanded

When the user clicks on one of the voting 'options', he/she will be taken to the page "HKID (owner 1)", where they will need to enter their HKID number. Note that this reflects the number of owners of the unit, which means that if two people own this unit, two HKID numbers will be required. After each owner successfully enters their ID numbers on the same phone, they will be taken to "upcoming meeting 1 - voting done".

poll 1 complete

The "upcoming meeting 1 - voting done" screen will appear for a couple seconds, then fade out into this "poll 1 complete" screen, where there is a green tick next to the collapsed Poll 1 card.

Past Meetings

The past meetings pages are the same as the upcoming meetings pages, except for the fact that the user cannot vote/click on 'options'.

Surveys

Surveys are also expandable cards. When the user clicks on "Survey Question", options will expand underneath, where the user can then select one or multiple options, depending on the question. Once that survey question is complete, it will collapse into just the grey bar and show "Survey Question" *completed* or with a tick at the right of the grey bar.

There will also need to be form validation, in case the user does not fill in all the survey questions before clicking on 'submit'.

Please use these components from the Ionic template, and design the specified pages as close to the template as possible. For the pages not specified here, apply as much of the template to those pages:

1. list-view —> google-card —> layout-2
Pages: upcoming meetings, past meetings
2. login —> layout-1
Pages: login
3. register —> layout-1
Pages: ownership, ID verification (1/2), ID verification (2/2), company chop (contingent), register, personal details
4. register —> layout-2
Pages: profile
5. splash-screen —> layout-1
Pages: opening animation when user's click to open app
6. check-box —> layout-1
Pages: surveys, surveys-complete, poll 1 complete
7. ionic template menu bar
Pages: menu

8. tabs —> layout-1 and layout-2
Pages: all screens with footer tab
9. spinner —> 7th option
Pages: loading screen in-between every screen that needs to load
10. list-view —> google-card —> layout-3
Pages: noticeboard
11. parallax —> layout-4
Pages: upcoming meeting 1 (view polls), upcoming meeting 1, upcoming meeting 1 - poll 1 expanded, poll 1 complete, past meeting 1
